We contacted Terry after seeing rats in the garden, then hearing them in the attic - this was on a Sunday. He explained his methods and prices and agreed a plan beforehand and then got started immediately with checking our house, the drains, all around the garden, etc. He was extremely thorough and stayed over an hour, checking everything and giving advice. | 30-Jun-2020 | <p>He kept in touch at all stages which reassured us enormously. Thank you for your help and kindness.</p> <p>I am the neighbour and my boundary backs onto a large completely overgrown garden owned by the owner. As there is a very bad rat infestation on the other side of my fence, I alerted my neighbour to the very real health issues. We regularly see several rats in our garden as presumably they break through our fence on their way to forage further afield. Terry was contacted by my neighbour and he promptly called to investigate how the infestation could be eradicated. He called on several occasions and left several black boxes containing specialist rat poison having ascertained many rat nests were on the neighbours land. Since the early visits, I am pleased to note that the amount of sightings has reduced dramatically. I am very impressed by Terry and would have no problem in recommending him.</p> |
