- 04-Apr-2019 Incredible. I have a steep driveway which was in a bad condition. Lots of cracked concrete . It had also got very slippery. He had a very difficult job to do here. When John excavated the bottom third of the driveway the concrete was about 15 inches thick with a huge amount of infill to move. The garage at the end of the driveway also flooded regularly because of the steep angle and one inadequate soak away. He was also very aware of Health and Safety and the company he uses for that came to inspect the site. I now have a most lovely driveway.
- 28-Mar-2019 I received excellent service from all company personnel engaged on the project.
- 28-Mar-2019 I found the level of service provided by this company to be very good, stepping in to take over the overall management of the project and the landscaping elements from the original contractor who was failing to perform adequately. The taking on of these additional responsibilities did stretch the company's available resources resulting in delays in completing the project, however this did not detract from the excellent level of workmanship which was evident
