Comments: Sash Window draught proofing and refurbishment. Repairing your old wooden sash windows will give them a whole new lease of life and make them a pleasure to use.

Draught proofing will considerably improve their performance and your comfort by reducing draughts, heat loss, noise, dirt and dust. It is suitable for listed buildings, conservation areas and is virtually invisible.

Your existing windows may also be suitable for conversion to double glazing without replacing them.

I am happy to discuss your requirements and give no obligation quotes.

04-Feb-2020	Matt Stevens repaired and renovated a pair of large sash windows for me last summer. My house is grade two listed so any alterations have to remain in keeping. The windows had been rather dilapidated and the sashes on both were broken. Matt did a wonderful job, the timber frames rubbed down and painted and the sashes replaced. I have no hesitation in recommending

him. M. Johansen. Exeter.

The initial visit and quote was very quick and the work easy to schedule. It was carried out in a very professional way despite the stormy weather. Matt explained the process well and the house was left clean and tidy following the visit. What I imagined was a complicated job was carried out in an efficient and straightforward way. Would highly recommend.

I would recommend the sash man. Matt has visited my grade 2 listed house a number of times to ease painted shut windows, add locks, replace cracked panes and refurbish sash windows that would not stay open etc. He has always been very prompt in responding to my e-mails or phone messages and has always provided quotes that he has worked to in terms of cost. These have been very clear on what is included/not included in terms of the scope of the work. He has also always arrived at agreed times and dates to conduct any work. I have been called away whilst Matt has been working in the house and have never had any issues leaving him working alone.
