Paul carried out the replacement of mine and my neighbours car port. He was very efficient and also repaired my neighbours roof and the down pipe of another without making any fuss and at a very reasonable price would definitely recommend him and in fact have to a couple of friends

Used Paul for the last 4-5 years trustworthy reliable gets job done no fuss

20-Jun-2017

Over the years plaster in a bedroom had cracked round a flue liner. Paul explained why the plaster had cracked and reassured me it was not due to subsidence. Throughout the repair process Paul explained what he was doing and why. He took great care throughout; stressing the importance of slow drying to avoid hairline cracks in the new plaster. After he had finished, he gave telephone advice during the critical drying stage. Paul's wasn't the cheapest quote, but I think I made the right decision in selecting him to do the work.

Paul is professional and someone who you can trust. He will carry out the job with the same care and attention as if it was his own home. All work was carried out on time and to the agreed cost.

We are very pleased that we found Paul through our neighbour after recently moving house and discovering numerous jobs needed doing straight away! He has done an excellent job replastering walls, knocking out

30-Oct-2016	<p>fireplaces, repairing fascia , exterior rendering Etc He was also very helpful when we had an emergency mains water leak and saved the day! He has a wealth of experience which includes working with period properties and has a good eye for making suggestions that you may not have thought of. He always arrived early and worked a full day consistently. We will definitely be using him again.</p>
	<p>The work that Paul has completed on our house has included: Replacing broken and/or cracked roof tiles and repairing faulty valleys and verges Completing work on the soffits that was left unfinished by previous builders Removing the ineffective drainage channels on the driveway and installing a new system. This also involved replacing broken drain pipes Lifting and re-laying an area of block paving on the driveway that had sunk In the ensuite bathroom lifting loose floor tiles and then re-laying having prepared the floor to prevent future problems Boarding a section of the loft to provide increased storage area. We have found Paul to be a conscientious and skilled craftsman. An example - with the driveway drainage he took care to ensure that where the new system was connected to the existing drains that the original drains were undamaged and if they were then cutting back until sound. Paul takes photos to show the problem(s) and the completed work where his finished work would not be visible - the drains. Paul takes pride in his work and he is always willing to provide clear information about how he will undertake a task. With the roof valleys, he proposed two solutions and prices and left the decision to us. In the future when we need building work done we will be calling on his services.</p>
