We were very pleased with the work carried out. We were nervous about it as we have a wooden house and did not know what to expect once the old windows were taken out. We need not have worried as all was okay. No rotten bits of wood in the frames. We also had the fascias, soffits and cladding done both front and rear. Our phone line came through the edge of our front door rather than through the door. This was routed through the same place on our new front door and sealed up nicely. Overall the two workman that carried out the installation were polite and it was a lot of fun to hear their banter. They carried out an excellent job and we would be happy to recommend the company to friends.

14-Oct-2016	An exceptional, hard working group of dedicated experts. The conservatory is lovely. Might I suggest, to be more customer friendly, some things could be returned to normality i.e the metal plate in the ground for closing the gates with bolts was flattened to allow access. It would have been nice if it had been returned to it's original upright position, I had the tools and energy to do this but some people might have had difficulty. (No complaints)
