I cannot rate Dibben Electrical high enough. We have used them for electrical work in the house and a complete upgrade of electrics in the garage and outside electrical point. They always provide a professional and friendly service, and are very punctual and tidy.

Dibben Electrical were really professional, they had to come back a number of times during the build to accommodate delays and slight changes to the plans - and did so with a very positive can-do attitude. Nothing was too much trouble, they were polite, courteous and ultimately just got on with the task at hand.

Quick and accurate estimate given, matching with amount on invoice. Attended site promptly as arranged, completed work (replacement LED ceiling downlights) very quickly, efficiently with no fuss or mess. Very helpful and knowledgeable in looking at another potential job and advising me while on site, with further estimate and guidance on that work following shortly afterwards. Would definitely use this firm again.

24-Aug-2018	Recently fitted several ceiling light fittings. Engineer arrived on time, worked efficiently and tidied up afterwards. Very pleased with the completed work.
21-Aug-2018	I was given Marks number by a client of his - I had no experience of using an electrician in the area so was having to get a recommendation. When I called Mark he was already on another job, but when I explained that I had only 36 hours to get this "small job" (replacing 4 downlights in a bathroom) done, when I asked he estimated a cost, and he said he would try and get to me later and would let me know when by calling me . As promised he rang back, gave me a 20 minute warning and arrived ,assessed , completed the work and checked it within an Hour at the outside! He was very careful to leave the place as he found it , using a dustsheet and having removed his shoes . I have to say I was very impressed-with everything , attitude , efficiency, value for money and peace of mind !
